

# California OES Weather Threat Briefing

Friday, October 29, 2021  
9:00 AM PDT

**Day 1 (Friday):** Locally dense fog will be seen across the Central Valley through late morning, with additional dense fog possible across coastal southern California tonight. Periods of showers will return to far northern parts of the state this evening and tonight, with mainly light to moderate rainfall amounts.

# **WEATHER KEY POINTS**

**10/29/21 - 11/04/21**

## **Friday-Thursday**

- Periods of showers will work across far northern California later Friday through Saturday, with scattered thunderstorms also possible Friday night into early Saturday
  - Mainly light to moderate rainfall amounts of one-half inch or less are expected, though brief local heavier downpours could occur with any thunderstorms
- Additional periods of rain are possible across northern and central California for the early and middle portions of next week
  - Primarily light to moderate precipitation is expected; locally heavy rainfall may be possible Wednesday into Thursday, but confidence in this possibility is currently low
- After a warmer day on Friday, much cooler temperatures will be noted statewide for the weekend and much of next week
